Dear Dave, I sure was pleased to receive your QSL and letter this morning! — really great!

I teach 14 to 15 year old boys Electronics and Engineering at a Public School in Bath (call G4LYW HI). We have 300 boys from all over the world including some from USA. HI! My radio room is about 300 yds away from the computing room — we don't get any trouble from R.F.I. but I can guess the troubles you have! I use a home made transceiver on SSB at school — we have 4 rigs there for H.F! — not too active though due to 'lessons'!! I worked Eric VK9PCO just after your test to QRT — we had QSO + QSL + on SSB 14342 Mhz — he only has 200w to 120' W.R.E. AT 10' IN CORAL SEA HE'S 15 yrs old — AT SCHOOL I hope we make it again Dave for longer chat. CU CB + TAKE CARE
